NeuroStar®
Advanced Therapy for Mental Health

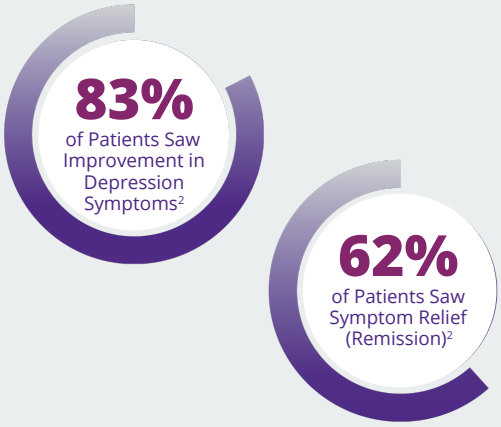

TAP INTO A NEW POSSIBILITY
for adult depression

- Treats depression **at the source**
- **Non-drug** and **non-invasive**
- **Covered** by most insurances

The #1 Physician Recommended TMS Treatment

Since 2008, NeuroStar® has been used over 6.6 million times in 182,000 patients, proving to be safe and effective for adults with depression.[1]

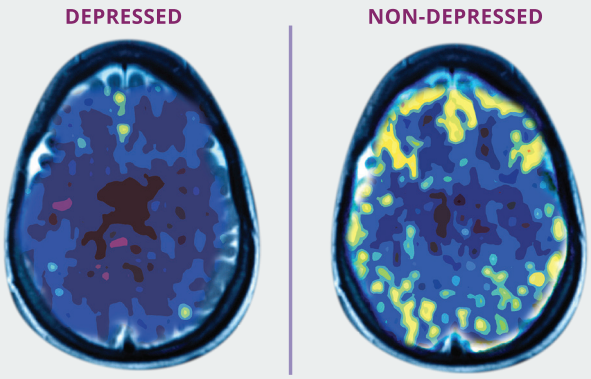

Long-Lasting Results

NeuroStar is the only treatment clinically proven to be effective through 12 months in treatment-resistant depression (TRD) patients.[3]

Treat Depression at the Source

NeuroStar TMS (Transcranial Magnetic Stimulation) goes right to the source of depression – your brain. It is a non-invasive, non-drug treatment that uses focused magnetic pulses to "wake up" those areas, and help your brain work the way it should.[4, 5] It's like physical therapy for your brain.

Real People. Real Results.

*"When I got NeuroStar, **it was honestly like a difference between night and day.** My general outlook on life just got a lot better, and life in general felt a lot lighter and not like a burden."*

- Shelly

*"I had taken 11 different medications without any relief... **NeuroStar helped me bring my life back**... with a happiness that I've never experienced before."*

- Todd

*"NeuroStar treatment has **changed my life**. It's given me life, it's given me joy, it's given me opportunity."*

- Colleen

With NeuroStar, All You Have to Do Is Show Up

NeuroStar is an easy, in-office experience.
You are awake and fully alert during treatment.

A session lasts as little as **19 minutes** per day*

Resume normal activities **immediately** after treatment

36 treatment sessions to completion*

Adult Indications for Use
The NeuroStar Advanced Therapy System is indicated for the treatment of depressive episodes and for decreasing anxiety symptoms for those who may exhibit comorbid anxiety symptoms in adult patients suffering from Major Depressive Disorder (MDD) and who failed to achieve satisfactory improvement from previous antidepressant medication treatment in the current episode.

NeuroStar Advanced Therapy is only available by prescription. A doctor can help decide if NeuroStar Advanced Therapy is right for you. Patients' results may vary.

Important Safety Information
The most common side effect is pain or discomfort at or near the treatment site. These events are transient; they occur during the TMS treatment course and do not occur for most patients after the first week of treatment. There is a rare risk of seizure associated with the use of TMS therapy (<0.1% per patient).

Visit neurostar.com for full safety and prescribing information.

You Are Not Alone

More than 280 million people around the world struggle to overcome depression,[6] a disorder caused by decreased activity in areas of the brain involved in regulating mood.

Now there is a new possibility to ***beat depression*** - NeuroStar® TMS.

Covered by Most Major Insurance Companies

More than ***300 million people***[4] in the U.S. have insurance that covers NeuroStar.
Speak with a NeuroStar Provider to find out if your insurance covers NeuroStar TMS.
Financing options may be available for patients whose treatment is not covered by insurance.

Visit NeuroStar.com for more information.
